

Intern

flexible hours, employment engagement

We're looking for people interested in developing their skills at an IT Security Company by working on our client projects and in our internal structure.

Arco IT – Who we are

We are a boutique IT Security consultancy firm with a small but growing team that aligns our services to the NIST Cybersecurity Framework. We mainly support companies in the Zurich region, and help our clients identify their current security strengths and weaknesses by performing IT Security Assessments. Our team supports clients to improve their protection against cyber-attacks by developing their Cyber Defense Strategy. We support them in the detection of attacks, and we are there if they need help in recovering from incidents.

Who we're looking for

- High school or University student
- Interest in working for and developing a growing cybersecurity company
- Client focused and a team player
- Flexibility to work both in a team and independently
- Looking to work with companies of different sizes, industries and corporate cultures
- Passionate to learn and practice a broad set of skills: IT development, networks, systems management, digital workplace, cloud solutions; finance and facility management; marketing and sales
- Good communication skills in English and German

What we offer

- A dynamic and flexible work environment
- The opportunity to help develop and shape the company
- Work in different industries (IT, banking, health, retail)
- Professional training and development on the job
- Client work around the region of Zurich

Reasons to apply:

You have a passion for what you do and want to learn more

You like the challenges provided by working in a dynamic IT security company

You want to automate tasks so you can move to more challenging undertakings
